pool covers & rollers

**COMMERCIAL  
SOLUTIONS  
FOR EVERY POOL**

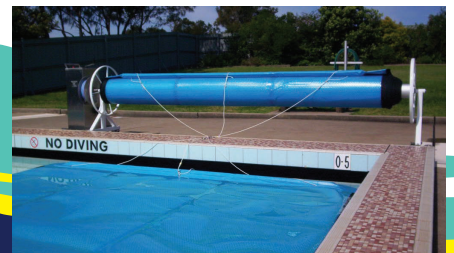

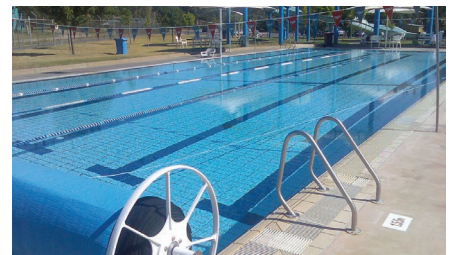

# Big on experience. Big on solutions.

Daisy is Australia's largest supplier of pool covers and rollers to the commercial industry. We have been in the pool cover industry for over 36 years.

Our commercial products have the strength and durability to withstand the harsh climate and conditions that an Australian public swimming pool is exposed to.

Our service, expertise and product design and quality produce cost reductions that are multiplied with commercial purchases. If your operation is considering the cost saving benefits of a Daisy pool cover and roller system, contact our commercial division [commercial@daisypoolcovers.com.au](mailto:commercial@daisypoolcovers.com.au)

## Be water wise

Save over 200,000 litres of water per month (50m pool)

## Be energy wise

Save 30-40% energy cost

## Be money wise

Daisy will pay for itself in 12 months

# Daisy Commercial Covers

Our Commercial Pool Cover range includes our two market-leading products:

1. The **525 Solar Cover** using our patented UltraDome™ Technology delivering best-in-class thermal efficiency, unparalleled performance and longevity in the life of the pool cover; and
2. The **ThermoTech™ Thermal Foam Cover**, a 4.5mm thick, cross linked PE closed cell Polyethylene foam pool cover.

Daisy pool covers and roller systems save on a large scale:

1. Saves pool warmth and reduces heating costs by 30-40%
2. Saves on cleaning costs
3. Saves on the cost of chemicals and retains chlorine
4. Reduces evaporation by 99.98%  
In practical terms this means you stop water loss when the pool cover is on the water.

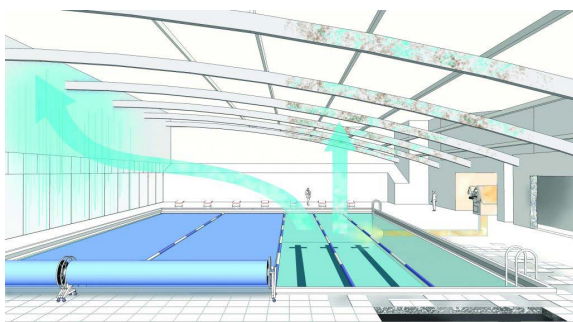

We can show specific savings using your pool and energy data with our UNSW Poolheat Program.

**Mean Daily Evaporation Rate (in mm) for the October to March 6 month daily average from The Bureau of Meteorology**

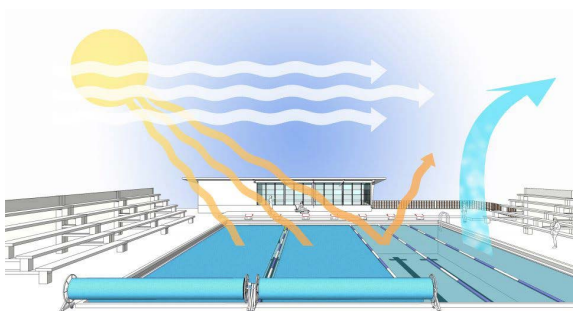

Sydney	Melbourne	Brisbane	Adelaide	Perth
6.4mm	6.4mm	6.9mm	7.4mm	8.3mm

Example: 50m x 20m outdoor pool in Brisbane loses 207,000 litres of water in a 30 day period in summer due to evaporation

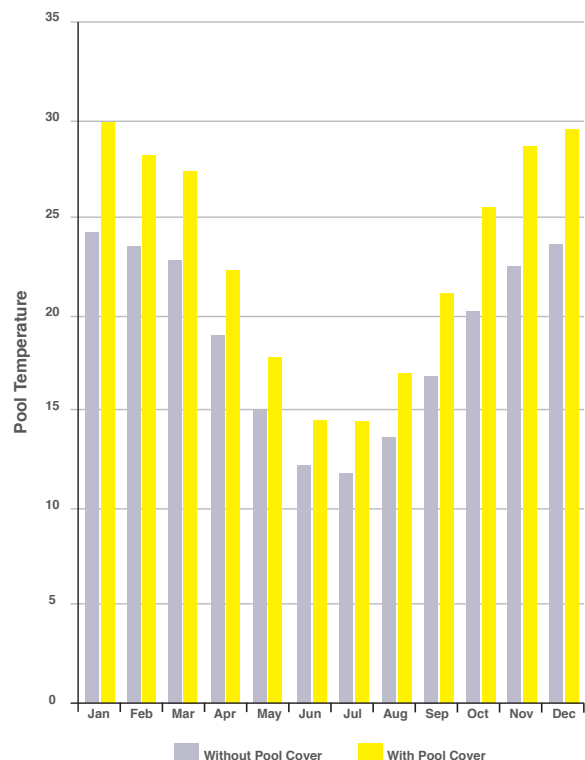

5. Reduces building maintenance, corrosion and condensation in indoor heated pools
6. Extends the swimming season
7. A Daisy will pay for itself in 12 months

Indoor Pool Evaporation

Outdoor Pool Evaporation

# ThermoTech™ Foam Pool Covers

5 year pro-rata warranty

Daisy's Commercial ThermoTech™ foam pool covers are a popular option when it comes to helping retain the heat in your pool and reduce evaporation.

The ThermoTech™ covers have been developed to offer an extremely effective R-value (thermal resistance) of 0.13m<sup>2</sup>/K.

The 4.5mm thick foam Thermotech™ covers incorporate Daisy's innovative cross-linked closed cell polyolefin foam.

This commercial-level foam consists of three key layers; with the foam flame bonded each side to a UV (Ultraviolet) stabilised, woven PE (Polyethylene) Canvacon material.

Daisy's advanced closed cell foam layer provides excellent insulation and water repellency properties. The proven ThermoTech™ design is also resistant to chemical degradation, with the outer woven layers give the pool cover its superior strength and durability.

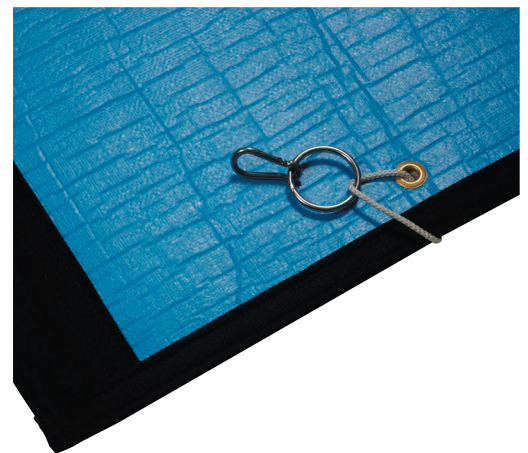

## Thermal Foam covers come complete with:

- ✓ 5 year pro rata warranty
- ✓ Full edge binding
- ✓ End reinforcing
- ✓ Haul cord
- ✓ Flotation pocket
- ✓ Windskirting option
- ✓ And piggy-back, if needed as a no cost option.

## Thermal Foam cover benefits:

- ✓ Class leading
- ✓ Superior heat retention
- ✓ Stop evaporation
- ✓ Save energy
- ✓ Pays for itself in 12 months

Cover Specifications	
Material thickness	4.5mm
Thermal resistance (R-value)	0.13 m <sup>2</sup> /K w
Nominal Weight	585gsm
Material	Reversible
Colours	Blue, Green and Silver
Warranty	5 year pro rata
Origin	Made in Australia

# UltraDome™ Solar Pool Covers

5 year pro-rata warranty

Daisy's Commercial 525 pool cover leverages Daisy's advanced UltraDome™ technology. This product-leading innovation delivers best-in-class thermal efficiency; unparalleled performance; and longevity in pool cover life.

Daisy Commercial Solar Pool Covers have an R-value (thermal resistance) of 0.10 m<sup>2</sup>/K. Its patented design and innovative manufacturing process are the hallmarks of Daisy Pool Covers' outstanding quality.

Daisy's Commercial Solar Pool Covers are made from commercial grade 525-micron PE (Polyethylene) material. Daisy's advanced manufacturing techniques use super toughened polyethylene containing maximum antioxidants, tougheners and UV (Ultra Violet) inhibitors to resist sun, salt and chemicals.

Daisy UltraDome™ covers are translucent, allowing maximum transmission of warming solar radiation into the pool water while also efficiently insulating against heat escape. In an outdoor pool, the UltraDome™ cover will insulate the water overnight and can assist in the heating and evaporation of the pool during daylight hours.

### Bubble covers come complete with:

- ✓ 5 year pro rata warranty
- ✓ Full edge binding
- ✓ End reinforcing
- ✓ Attached over cover
- ✓ Haul cord
- ✓ Flotation pocket with float rod
- ✓ Windskirting option
- ✓ And piggy-back, if needed as a no cost option.

### Bubble cover benefits:

- ✓ Free water heating during daylight hours
- ✓ Class leading
- ✓ Stop evaporation
- ✓ Retain Heat
- ✓ Save energy
- ✓ Pays for itself in 12 months

Cover Specifications	
Material thickness	525 micron
Thermal resistance (R-value)	0.10m <sup>2</sup> /K w
Nominal Weight	460gsm
Colour	Blue
Warranty	5 year pro rata
Origin	Made in Australia

# Daisy Commercial Rollers

Daisy Commercial is the problem solver for large and commercial swimming pools. No matter the pool you have, the Daisy Commercial team will work with you to find a customised solution that will best suit your business and environment.

## Manual Mobile Rollers

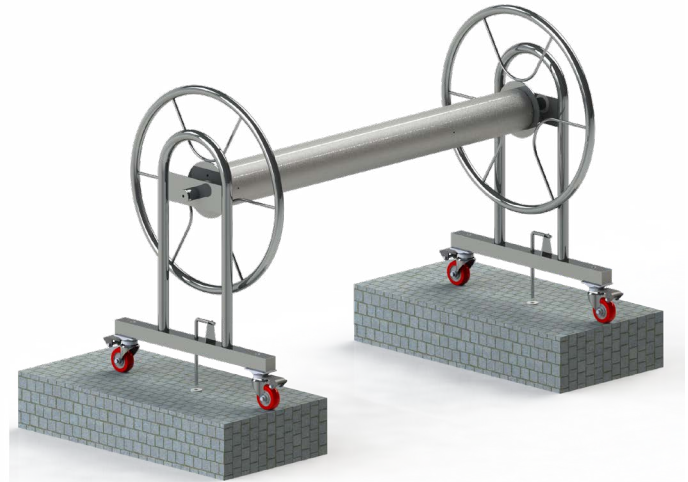

10 year pro-rata warranty

Daisy roller systems are designed specifically to suit any commercial pool sizes. The stainless steel Manual Mobile Rollers are made with marine grade 316 stainless steel frames, castors and hand wheels.

The main spindles of the storage roller are manufactured from clear anodised aluminium tube (in 125mm, 152mm or 203mm diameters). To make manual operation as easy as possible, hand wheels are available in 500mm and 700mm to 900mm diameters. Roller systems are designed for all commercial pool sizes

If required, all roller systems can be fitted with stabiliser bars or larger wheels. This will assist when moving the roller over hard, uneven ground. Outriggers are available for large holes or to go over starting blocks

All manual rollers have the square drive for Caddy Pro portable drive system to simply and easily deploy or recover roller systems.

## Under Bench Rollers

10 year pro-rata warranty

The Under Bench Roller combines practicality with style to transform the pool roller into useful seating while storing your pool cover.

Used manually or with the CaddyWM or Caddy Pro to power the roller, the Under Bench Roller keeps the concourse clear while also offering increased seating area around the pool.

## Wall Mounted

Daisy Commercial Wall Mounted Systems are designed to be mounted onto a wall, ground or structure that is perpendicular to the pool. The mounted design minimises the impact around the pool area, while making deployment and removal of the pool cover quick and convenient.

Unsure of what your pool needs? Daisy will help design a manual or automatic solution to suit application.

These solutions for commercial pools are unique, with a free wheel disengage system that is exclusive to Daisy Commercial. First for the pool cover industry, Daisy's wall mounted electric roller with disengage system. The disengage system allows the roller to free wheel and be used manually if desired.

# Caddy Pro

**Daisy Commercial Caddy Pro** is a commercial pool solution that has been designed and built as a robust portable drive to recover, and deploy, single or multiple commercial Thermal Foam or Solar pool covers onto Daisy Commercial Roller systems.

The Caddy Pro is a fully self contained, stand alone Stainless Steel console that suits any commercial pool from a single cover and roller, to multiple pools (e.g. 50m and 25m within the same complex) with multiple cover and roller systems.

The Caddy Pro's 24v heavy duty internal batteries will usually last for weeks of work however, as there is an inbuilt battery charging system (powered by normal 10A GPO), we advise to simply park and place the Caddy Pro on charge when it is not in use.

With tilt and overload protection, along with normally off switching (the unit will only work when a button is pressed, it will stop when you release the button), this simple yet robust system is designed to make every pool operator's life easier and reduce OH&S risk that may occur with manual roller usage.

Simple height adjustment allows the operator to fine tune the drive height to suit rollers within the surrounding pool area. The Caddy Pro can be used for all Daisy Commercial rollers with a 20mm square drive on them and can be built to suit the Daisy Commercial Under Bench Rollers' lower height.

The Caddy Pro drives forward and reverse with the push of a button so once it is on the drive of the roller, simply press the button to recover the pool cover back on to the roller.

The Caddy Pro console handle has been ergonomically designed to make lining up the internal square drive easy. The drive drum slides onto the external square drive of the roller while using the simple height adjustment then, with the press of a button, you are recovering the pool cover in no time at all.
