

THE POOL PUMP BOX

WHAT IS THE POOL PUMP BOX?

The Acoustic Box™ Company specialises in manufacturing swimming pool filter & pump enclosures. We now also manufacture **Pool Pump Boxes** to **enclose the pool pump only**, whilst still providing the requisite noise reduction and ventilation.

The Pool Pump Boxes have a versatile unique design which allow them to cater for 99% of pumps on the Australian market. They come in 3 different lengths, with sliding plates that can be re-positioned to cater for every layout.

Our pool pump boxes assemble in less than 5 minutes with a few simple screws and can be supplied and delivered to all areas in Australia.

SUPERIOR DESIGN

Industrially engineered to provide superior noise reduction whilst allowing enough **ventilation gaps for the pump to breathe**.

Made from thick 0.9mm BlueScope galvanised steel and finished with Dulux Colorbond powder coating. A **7 Year Warranty** provides peace of mind.

SOUNDPROOF COMPLIANCE SAVE \$\$\$ ON ENERGY BILLS!

The Pool Pump Box is lined with quality, 20mm thick acoustic grade foam and complies with CDC / building code regulations.

This means you can use your pump during off-peak hours saving you money. The noise reduction is certified by an **Acoustic Engineer's report**.
