

# PRE-CUT POOL COVERS & DIG TEMPLATES

## Three awesome reasons for a Daisy pre-cut pool cover

1. *A perfect fit is guaranteed*
2. *Saves time and costs*
3. *It's easier to install and use.*

**The perfect fit for any pre-fabricated pool.** Pre-cut pool covers can be tailored to unique pool shapes and sizes, providing the perfect fit for fibreglass or pre-manufactured pools; so long as the brand and model of the pool are quoted with the words 'pre-cut' on the order.

Daisy uses an electronic 3D point capturing device to measure and accurately plot the data to help reproduce a pool cover to the EXACT shape of the pool. The data can be manipulated so the cover can be cut and supplied to fit waterline or oversize for an upturn.

**A new pool?** Dig templates, made out of special width builders plastic, are cut to the exact pool shape. It is then laid out in the backyard and correctly placed so pool owners-to-be can easily visualise and approve the pool location even before digging begins.

This degree of accuracy and precision used in measuring and collecting the data guarantees a perfect fit for all pools every time. Plus – they're easy to install.

**Saving everyone time and money.** This technology eliminates the need to return to site to measure up and cut to shape, saving a substantial amount of time, money and double handling as it will all be taken care of on the first visit.

**Making it easy for you.** The level of service is a win/ win. For pool owners, it saves time and second guessing. For installers, it's a perfect fit – always!

New selections of pre-cut pool covers and dig template shapes are added as soon as measurements become available. Contact Daisy today. Visit our website for further details and pricing.

## AUSTRALIA'S FAVOURITE.
