WARRANTY INFORMATION

At Daisy, we stand by our quality product and we mean it!

We rarely get a warranty claim but just in case anything goes wrong we're here to help you. All Daisy products come with a pro-rata warranty which covers the purchaser for defective material or workmanship on a pro rata basis as set out below. The manufacturer will repair or replace the product upon inspection or photo image. Daisy reserves the right to refuse repeat claims of the same damage.

Daisy Pool Cover	Pro-rata Warranty Cover
S3 Series 3 (200um) UltraDome™	3 years
S4 Series 4 (300um) UltraDome™	4 years
S5 Series 5 (400um) UltraDome™	5 years
S8 Series 8 (500um) UltraDome™	8 years
ThermoTech 3mm Foam	8 years

Extended warranty up to 10 years when installed by a Daisy expert

The average life of a Series 8 pool cover is eight years. When installed and used correctly, your Daisy will last a lot longer. To ensure you are getting the most of out of your Daisy, we will offer you an extended pro-rata warranty of up to 10 years if your Daisy is installed by a Daisy Expert. Please contact your local pool retailer to arrange for your Daisy to be installed properly by a professional.

CONDITIONS: The warranty may be void if:

1. The purchaser fails to comply with the manufacturer's installation instructions.
2. Exposes the cover rolled or folded to the sun.
3. Subjects the cover to conditions, which result in tears, cuts or damage.
4. Stores the cover at a temperature above 45 degrees Celsius.
5. Stores the cover in other than complete shade.
6. Allows the chlorine levels to be maintained at a higher than normal level.

This is a pro-rata month by month warranty. This means that Daisy pays for the amount of time that you do not achieve from your pool cover, up to the maximum warranty period. It also means that you must pay for the period of time during which you have used the product.

NOTE: This warranty is not redeemable for cash, only as a discount on a replacement cover purchase.

Register Your Warranty Online

Because your Daisy can last for so many years, register your warranty online at Daisy. We'll keep all your details safe for you so you don't have to!

Two easy steps:

1. Scan your purchase receipt. Ensure the date of purchase is clearly visible.
2. Go to our website, and click on Warranty Registration. Fill in the details and send!

Please staple your purchase receipt to this page. Register online now @ www.daisypoolcovers.com.au

CARING FOR YOUR DAISY

Without proper care ANY pool cover can be ruined in less than HALF of its predicted life span. 95% of all warranty claims are not caused by product failure, but by owner misuse such as: leaving a cover rolled up out in the direct sunlight while off the pool; and having excess chlorine in the pool - either a little too high over a prolonged period or a lot too high over a very short period. Owner misuse such as these may VOID YOUR WARRANTY.

Getting the maximum life from your Daisy pool cover or roller

1. Maintain correct chlorine levels and test your water regularly.

- Keep chlorine levels less than 3ppm. Your cover will deteriorate quicker when you have excessive chlorine as it is a corrosive agent and creates wear on the cover.
- Please do not assume that your salt-water chlorinator can control chlorine levels in your water.

2. When super chlorinating, ensure that you take the cover off.

- Leave the cover off for 48 hours to allow your chlorine level to return to normal.

3. Do not leave the cover folded or rolled up in the sun.

- Store the pool cover in a completely covered environment; in full shade and not under shade cloth. The sun and heat will cause corrosive wear and will cause the cover to be damaged in strips across the cover resulting in delamination, and in extreme cases overheating on the roller can cause the material to become molten and weld onto itself.

4. Hose thoroughly before storing your cover for long periods of time.

- Wash the pool cover on both sides with fresh water to remove any pool chemicals to eliminate the possibility of chlorine residue from burning the cover.
- This does not apply if you are replacing the cover within 24 hours.

5. Always use your Daisy over-cover whenever your cover is on the roller.

- Every roller is supplied with a free white Daisy over-cover.
- Whenever your cover is rolled up on the roller ensure the over-cover is in place.
- Protect the pool cover with only recommended over-covers. You can store your cover on the roller with your white Daisy over-cover in place in direct sunlight; serviceable Daisy over-covers block the sun. Tarpaulins or anything other materials will reflect the sun's rays or absorb them.

Care Tips

1. Whenever the cover is rolled up on the roller, ensure the over-cover is in place.
2. Use the white over-cover EVERY TIME you store your pool cover on the roller. Even if the swim is only for 10 minutes, the over-cover must be in place as this is enough time to damage the pool cover.
3. Roll your cover over the top of your roller. Locate the roller at the opposite end of any extended areas (ie; steps/ swim outs) and fold over to roll up. See below.
4. When recovering your pool cover onto the roller ensure it rolls up evenly! Also ensure the over-cover is used every time.
5. Fold in any flaps or step areas on the cover before rolling it up. This will ensure that you don't put excessive force on the cover and allows it to move easily.
6. When laying the cover back onto the pool, roll the cover out slightly, fold one corner over onto itself to create a bow effect, then pick up the other corner and walk slowly down the side of your pool.
7. To prevent damage to your cover, do not drag the cover over abrasive pool decking or any sharp surfaces.
8. Excessive temperatures can damage your cover. Ensure your pool does not reach excessive temperatures.
9. Most dirt and debris can be hosed or swept into your skimmer box. If you have a large amount of debris on top of your cover, a broom or brush can be used to sweep it into a pile for removal. Water and a soft brush are all that is required to remove heavier grime.
10. If a storm is imminent, roll up the cover and store it safely.
11. Do not sit or step on your roller. If the tube gets bent, it cannot be repaired.
12. When using your roller, ensure that the brakes on the castors are locked.

Daisy over-cover used when cover not on the pool.

Once installed, your cover and roller are easy to move away.

AWARD WINNING ULTRADOME™

Daisy quality. Built to last

- Trademarked technology
- Max heat retention
- Eliminates 97% evaporation

Only Daisy pool covers utilise the trademarked and award-winning UltraDome™ technology to deliver maximum durability, heating and heat-retention and value.

Our unique moulding technique enables the polyethylene (PE) bubble layer to be formed in a profile that is consistent in thickness for greater strength, insulation and minimised water loss. All Daisy covers use category 4 LDPE (low-density PE) which means they are all recyclable.

Maximum solar warmth penetrates lighter cover material to warm the pool water - not the cover

Three easy steps for installing your pool cover

1. Lay the cover bubble side to the water.
2. Flatten out all air bubbles so that the cover sits relatively flat on the water.
3. Using your pool as a template, take a pair of ordinary household scissors (the sharper the better!), and with someone holding the cover in position, cut the edge of the cover so that it sits flat on the water with 50 -75mm rising up the side of the pool - not necessary to the top edge of the pool.

If preferred, you can:

- a) Cut the cover back to waterline however wait two to three weeks after initial cut for it to settle down.
- b) Cut two vertical slits in the cover upturn, either side of your skimmer box, fold the flap you have created into the skimmer box, therefore allowing you to hose debris off the top of the cover into the skimmer box. Your Daisy cover is delivered with an ample margin for trim. In some cases the excess is sufficient for secondary use and left for you to use as you see fit.

WARNING: Solar pool covers are not safety covers. They are not designed to support people. Do not swim under the cover.
